

My name is Dan Moore. I live in Kalispell Montana 6 months of the year and Landusky Montana the other 6 months, in area 620.

I have been bow hunting in the Missouri Breaks for over 30 years.

I have watched the decline of the wildlife in the breaks due to heavy hunting pressure from non- residents. While I appreciate their desire to hunt in Montana, over 700 non-residents in one area per year is too much. Montana's wildlife should be managed for Montana residents.

When Montana began requiring permits in the breaks, it cut the non-resident tags to 10% maximum, down from over 40% previously. The wildlife quality is returning, making it a world class place to hunt once again.

As wolf problems increase in western Montana, displaced bow hunters are looking for other hunting grounds like the Missouri Breaks. This will put more pressure on land owners to let them hunt.

Montana resident bow hunters are the ones paying the taxes. They support the local businesses, buying food, gas & renting rooms from locals.

With the existing permit system, every resident bow hunter applying for the Missouri Breaks as a first choice can draw a tag.

I have hunted elk in nearly every western state in the US. **All** of them have a 10% cap or less on nonresidents.

Let's let the Montana F&G *professionals* manage our wildlife.

This bill promotes privatization of Montana wildlife.

Thank you,  
Dan Moore

Petition to oppose HB 361

"may not limit or reduce the number of archery-only elk permits available in a hunting district from the number issued for that district in 2007 OR IMPLEMENT LIMITED-ENTRY ARCHERY-ONLY ELK PERMITS IN A DISTRICT IN WHICH ARCHERY-ONLY ELK PERMITS WERE NOT REQUIRED IN 2007 unless the elk population in that district falls below 70% of the objective level determined according to 87-1-323(1)."

Thus eliminating the limited archery elk permit system in the Missouri Breaks and other limited archery elk permit districts.

We, the undersigned oppose HB 361 because:

- This bill legislates wildlife management and takes away the management capabilities of the FWP and FWP Commission.
- Wildlife must be managed based on science, not for the economic benefits of a special interest group.
- This bill promotes the privatization of wildlife.
- Prior to the limited archery elk permit regulations, some areas experienced tremendous over-crowding during the archery season, degrading the quality of the hunting experience.
